NASA Edge Visits LRO

NASA Edge heads into the LRO cleanroom
Originally uploaded by geosteph

The team from NASA Edge came to Goddard Space Flight Center on August 14th to prepare for a vodcast on the Lunar Reconnaissance Orbiter. They spent the day over in building 7 - where LRO was built, had it's six instruments integrated, and is now undergoing a series to tests in preparation for a late February launch.

The Edge guys spent time in the LRO cleanroom chatting with folks responsible for integration and testing. They also interviewed several Goddard scientists about the mission.

What a great team! We really enjoyed hosting NASA Edge at Goddard and hope they come back to visit again soon.
