# This Is Probably The Closest You Will Ever Get To The Moon

By [Jesus Diaz](#) on [October 2, 2009](#) at 9:20 AM

NASA Lunar Reconnaissance

Orbiter's Camera keeps sending [amazing high definition photos](#) of the moon. This new spectacular photo could be zoomed in until you smash your face against the rocks.

The whole image — composed of two weighs 268 megabytes, but Zoomify makes it hot butterish smooth to pan and zoom. I'm glad the LRO [can transmit at 100 megabytes per second](#). Now, could they please take a similar horizontal photo of one of [the Apollo sites?](#) [[NASA/GSFC/Arizona State University](#)]
